

Clinical Trial Part 2

REDUCTION of STAPHYLOCOCCUS-AUREUS-COLONIZATION by Padycare[®] silver coated textiles in patients with atopic eczema

Development: Department of Dermatology and Allergy, Biederstein,
Technical University, Munich, Germany
* Department of Social Medicine, University of Luebeck,
Germany

Participants: 15 patients diagnosed with atopic eczema

Duration: 14 days

Result: A highly **significant decrease of S. aureus-colonization** could be seen on the e silver-coated textile site. Clinical improvement correlated with reduction of S. aureus-colonization.
